

Procedure in the case of connection requests by downstream grid operators for the purpose of feeding into the Amprion

Procedure in the case of connection requests by downstream grid operators for the purpose of feeding into the Amprion grid

Qualified enquiry

Qualified enquiries for feed-in requests are addressed to Amprion in the form of a registered letter

The feed-in request must contain substantial information in accordance with Annex 1

Within two weeks following receipt of the qualified feed-in request or following receipt of the complete information, Amprion submits an offer for a feasibility study

Procedure in the case of connection requests by downstream grid operators for the purpose of feeding into the Amprion grid

Feasibility study

In particular, the study encompasses the following points:

- General grid evaluation of the feed-in options into the Amprion extra high-voltage grid
- Determination of the fitness of any existing grid connection points
- If necessary, determination of new grid connection points
- Grid usage studies
- Review of other effects of the feed-in request on the grid

Duration: 2 months after the corresponding prerequisites have been met

Chargeable for the prospect

Procedure in the case of connection requests by downstream grid operators for the purpose of feeding into the Amprion grid

Capacity commitment

Capacity commitment is issued on submission of the results of the feasibility study

Temporary grid connection capacity commitment with reference to the grid concept analysed in the feasibility study

The capacity commitment lapses if the basis of the feed-in request is no longer given

Procedure in the case of connection requests by downstream grid operators for the purpose of feeding into the Amprion grid

Contractual relationship

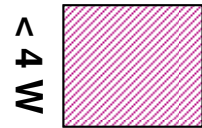

On implementation of the circumstances forming the basis of the capacity commitment, the capacity commitment is transferred to an unlimited contractual relationship

Procedural sequence overview

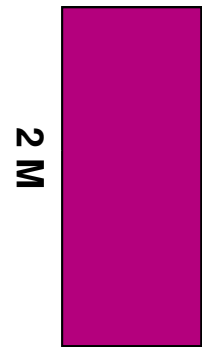

Qualified enquiry*

Offer to conduct a feasibility study

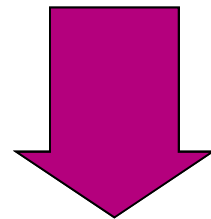

Commission to conduct a feasibility study
(after a maximum of 4 weeks)

Execution of the feasibility study

Submission of the feasibility study and a capacity commitment

Project plan verification

***Lapse of the connection commitment or
adaptation of contractual relationships***
